

## **MOBILE JUICE PRODUCTION UNIT** SERIES KML

## ADVANTAGES

- The trailer is completely made of stainless steel and aluminium
- It is equipped with a pressure-cleaner and a compressor
- Easy and quick cleaning
- Customer specific layouts such as bin-tipper, power unit, etc. are possible
- Every customer gets the juice from his own fruit

## MOBILE JUICE PRODUCTION UNIT SERIES KML

The mobile Kreuzmayr units are used for the processing of fruit juices on site. The fruit is loaded into the washing container with the bin tipper, transported to the grinder, crushed and then conducted to the sieve belt press. The generated juice is automatically pumped into tanks, heated to about 80° C in the pasteurizer, and then filled into BAGinBOX pouches or bottles.

## WORKMANSHIP

Since Kreuzmayr exclusively uses high quality materials, our manufacturing makes sure that the primary emphasis is on the longevity of our machines. This ensures a high corrosion protection which even resists concentrated detergent. The folding side panels of the assembly allow optimal operation, even during bad weather.

Mobile pasteurizer

## EASY OPERATION

The mobile assembly is ready to use on site within a short time. You only require a water- and a power connection and a waste-water drain, and then the juice processing can begin. All machines can be used separately or parallel to each other.

Mobile washing, grinding and pressing unit

6. Centrifuge (optional)
7. Pasteurizing unit
8. Filling station

## OTHER INTERESTING PRODUCTS FOR PERFECT FRUIT PROCESSING

### BIN-TIPPING MACHINE

Easy tipping of bins in several sizes

### BELTPRESSES

Automatic, continuous pressing of fruits

### PASTEURIZING UNITS

Pasteurizers in all sizes, heated by gas, oil or electric

### BAGINBOX FILLING MACHINE

Quick and convenient BAGinBOX filling

### BOTTLE FILLING MACHINE

Manuell or automatic filling of bottles
